Sandeep Choudhary

Profile

Experienced PHP Web Developer skilled in building dynamic websites, custom forms, and Laravel-based dashboards with advanced admin and data export functionalities. Proficient in payment gateway integration, email automation, and developing secure jury scoring and screening systems. Strong knowledge of HTML, CSS, and Bootstrap for responsive UI development. A proactive team player with excellent collaboration skills, delivering efficient and scalable web solutions.

Career Objective

Goal-driven developer aiming to deepen knowledge in full-stack development, including backend architecture, database management, and responsive frontend design. Passionate about building robust web applications while expanding technical expertise in modern frameworks and best practices.

Work Experience

April 2024 – present

Executive(Web PHP Developer)

Internet and Mobile Association of India

Currently working as a **PHP Developer**, specializing in dynamic website and form development. Experienced in building **Laravel-based dashboards** with advanced features like data export, QR code generation, and admin access control. Skilled in creating secure, scalable systems including **jury scoring and screening platforms** using Laravel and CodeIgniter. Proficient in integrating **payment gateways** (CCAvenue), automating email workflows, and developing custom admin panels tailored to client requirements.

November 2023 –
February 2024

PHP Developer Intern

Impact Guru

Worked as a PHP Developer Intern in a product-based company, where I developed new functionalities, enhanced existing features, and contributed to a claim assistance module. Implemented and optimized API integrations for mobile applications, improving overall performance and reliability.

Technical Knowledge

Programming Languages & Frameworks Known

PHP, Laravel, CodeIgniter, JavaScript, jQuery, C, C++, Python, Core Java, HTML5, CSS3, Bootstrap, jQuery, Ajax

Database

PHPMYADMIN, SQL, MySQL

Tools & Platforms

Git, cPanel, XAMPP/WAMP, Postman, Mongo-DB, Python Shell

Others

REST API Integration, Payment Gateway Integration (CCAvenue), QR Code Generation, Email Automation, Admin Panel Development, Git, Ajax-file-uploader, Sweet-alerts, select2.

Skills

Problem Solving & Visual Thinking

Strong problem-solving skills with a focus on delivering result-oriented solutions, including creating visual representations of requirements before implementation.

HTML5 & CSS

Strong knowledge of HTML for frontend development. Proficient with CSS and Bootstrap for responsive and attractive styling.

JavaScript & jQuery

Strong proficiency in JavaScript and jQuery for DOM manipulation, event handling, and dynamic UI interactions.

Debugging

Strong debugging skills with problem handling and finding a proper solution.

Team player

Good understanding of teamwork and a highly active team player with experience collaborating across diverse teams and disciplines.

PHP & Laravel

Proficient in PHP with strong logic-building skills and understanding of OOP concepts. Experienced in developing secure and scalable web applications using the Laravel framework.

Git

Good knowledge of Git, including version control concepts, repository management, and day-to-day Git operations.

Enthusiasm, Creative & Decision-Making

Projects

CCAvenue Payment Gateway Integration

- Successfully integrated CCAvenue payment gateway (UAT and production stages) to enable secure and seamless online registration fee transactions with real-time payment status validation.
- Designed and implemented a dynamic coupon management system with automated discount calculation and validation during the registration workflow.
- Generated and assigned unique QR codes for each registered pass, embedding them in confirmation emails to enable fast and secure on-site check-in verification.
- Automated transactional email workflows, including registration confirmation, payment acknowledgment, and QR code delivery upon successful payment processing.
- Ensured data security and integrity by implementing input validation, secure transaction handling, and optimized database structures for high-volume registrations.

Recruitment Form and Backend Access System

- Designed and developed a dynamic recruitment form with secure backend access, ensuring controlled access for reviewers and administrators.
- Implemented an automated scoring system with detailed submission views, allowing reviewers to provide comments and ratings for each candidate efficiently.
- Enabled advanced data export (Excel/CSV) and reporting functionalities to streamline candidate evaluation, track progress, and support data-driven hiring decisions.
- Optimized backend workflows for accuracy, security, and scalability, ensuring smooth management of high-volume recruitment data.

Jury Scoring System – Waves Reelmaking/Short Reels

- Developed a robust backend system with admin functionalities for jury management, supporting both single and bulk jury member addition.
- Enabled precise assignment of participant short reels to specific jury members for structured evaluation and scoring.
- Implemented secure jury login with role-based access, allowing members to view assigned entries and submit scores across multiple criteria.
- Designed a comprehensive screening module to track jury scores, apply dynamic filters, and facilitate data-driven final shortlisting decisions.
- Ensured system scalability, data integrity, and secure access control for efficient jury operations and reliable evaluation outcomes.

Awards Backend Dashboard System

- Developed a comprehensive Awards Backend Dashboard with multi-user registration and secure login for nominees and participants.
- Enabled category-wise entry submission, with admin control for managing entries, scoring, and jury assignments.
- Implemented both regular and special jury scoring systems, including automated calculation and tracking of results.
- Integrated coupon validation and payment gateway processing for smooth registration and secure transactions.
- Designed admin panels for real-time monitoring, reporting, and management of entries, jury scores, and participant data.
- Ensured secure role-based access control and streamlined workflows for efficient event administration.

Education

2021

Mumbai, India

Graduation

M L Dahanukar College Of Commerce

I completed my graduation in BSc-It with 8.14 CGPA.

Declaration

I hereby declare that all the information given above is true and correct to the best of my knowledge.
